

Environmental Policy Statement.

- Protection of the environment is an integral part of all activities and it is policy to provide information and training to develop an environmentally and health and safety aware workforce and to manage its activities so as to avoid causing unnecessary or unacceptable risks to its employees, sub-contractors, customers, members of the public and the environment.
- All operations will be conducted so as to comply with all relevant environmental and health and safety legislation and to minimise the risk of all forms of pollution of water, air, and land, and nuisance due to odour and noise.
- In pursuit of these objectives the aim will be to minimise the use of materials which are harmful to the environment and will encourage suppliers, sub-contractors and customers to adopt sound environmental practices.
- We promote using energy and natural resources more efficiently and encourage the re-cycling of waste and the use of alternative fuels and recycled or sustainable products.
- Derek Bradshaw determines the Environmental Policy and has responsibility for all environmental matters and the implementation of the policy.
